## Your attic causes these problems:

**“My energy bills are too high”**

**Problem:** Your attic blasts hot air in summer & cold air in winter down into your home increasing your energy costs.

**“My family gets sick every winter”**

**Problem:** Your attic constantly sucks in billions of outdoor bacteria, viruses & mold. Then it blows those germs down into your home’s air making you sick.

**“My upstairs is hot & my basement is a freezer in summer”**

**Problem:** Your 130° attic oven bakes your upper floors forcing your A/C to overcool them. This excess frigid air then drops down into your basement making it into a freezer!

**“I don’t have enough storage space”**

**Problem:** You can’t store your nice things in your attic because extreme temperatures-0° in winter to 130° in summer- can easily damage your valuable property.

## Here are *C & R Insulation* solutions:

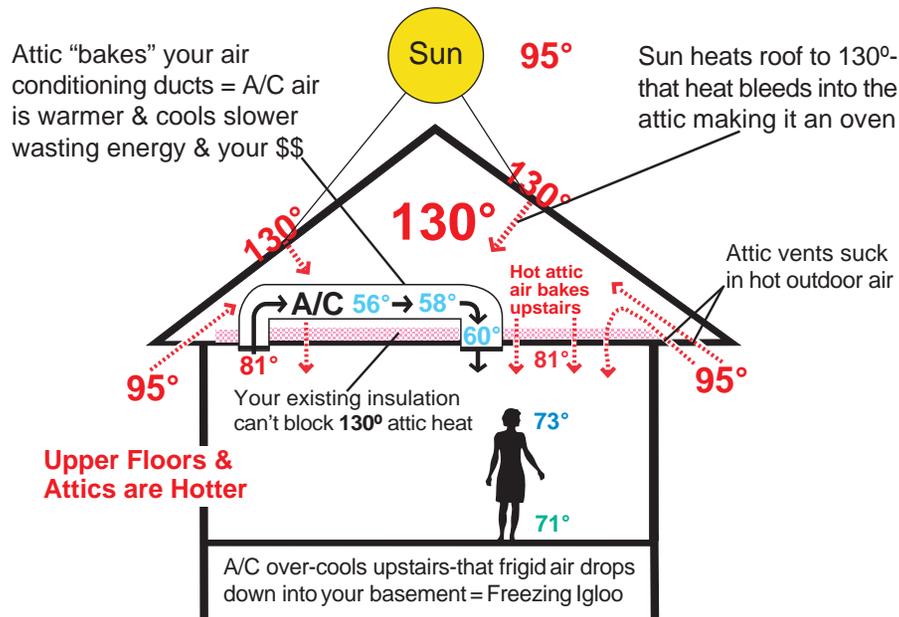

**Solution:** A *C & R Insulation Attic* prevents hot & cold outdoor air from penetrating into your home through the attic. Our insulation system prevents roof surface heat from baking your attic & your HVAC ducts. You’ll save energy, \$\$ and slow global warming. That’s **3 times Green**.

**Solution:** A *C & R Insulation Attic* prevents billions of outdoor germs from entering your attic. Keeping those unhealthy germs out of your attic prevents them from entering into your home & making your family sick.

**Solution:** *C & R Insulation Attic* eliminates your 130° attic oven! Your new “cool” attic frees up your A/C from overcooling the upstairs so now it won’t be dumping tons of excess freezing air down into your basement. You’ll now enjoy cool upper floors and a comfortable basement.

**Solution:** A *C & R Insulation Attic* blocks out hot & freezing outdoor air thus creating a new place to store all your stuff. Your new attic storage area can free up your garage space (so you can finally park your car in it) or a spare closet or get rid of your paid storage space. Celebrate by putting your holiday stuff up into your new conditioned attic storage space!
